

READY TO START YOUR MIGRATION TO SAP S/4HANA?

Moving to SAP HANA is a prerequisite to beginning the SAP S/4HANA migration process. By focusing on the planning phase in this checklist, organizations can accelerate the migration and reduce business disruption.

1. Understand your transformation and migration business goals

2. Decide on an approach

- With a greenfield approach, organizations implement a new system then migrate core data
- In contrast, a brownfield approach requires migrating data and adopting S/4HANA business processes in tandem

3. Create a staged approach plan

- Migrate piecemeal to limit business disruption

4. Set up baseline monitoring to learn which systems are used consistently

Contact Evolving Solutions to schedule a no-charge SAP HANA Assessment Readiness and Roadmap Planning (SHARP) workshop.
