

# THE STAIR STEP APPROACH TO SAP S/4HANA MIGRATION

While the deadline for SAP S/4HANA migration has been extended to 2027, organizations using other databases shouldn't sit back and wait to begin the lengthy conversion process. Rather, it's wise to take a stair step approach.

- 1** Migrate your database to SAP HANA on the right infrastructure.
- 2** Start small and migrate finance applications.
- 3** Proceed with analytics applications.
- 4** Migrate another application.
- 5** Repeat step 4 until your migration is complete.

Contact Evolving Solutions about setting up an SAP HANA Assessment Readiness and Roadmap Planning (SHARP) virtual workshop. By taking a holistic view of your infrastructure and business, the at no-cost SHARP workshops help organizations determine the best way to get from here to there.
